JUST  
WEAR  
THAT  
WORKS.

Welcome to HAKRO,

Here comes the 2026 HAKRO Collection: with 176 powerful models that strengthen your team's feeling of togetherness, ensure the perfect first impression and deliver exactly what matters in everyday working life.

Discover our biggest range to date, with endless potential for combining complete outfits for immediate delivery, and our first label-free collection without the HAKRO label but still offering 100% HAKRO quality.

We have three collection lines that present a solution to typical challenges posed by a variety of occupations. A new model overview also introduces each textile according to product group. It has never been easier to find what you want.

Find out in this catalogue, on our website and at authorised HAKRO dealers how "just clothing that works" can pay off for your company.

## Your HAKRO management team

**Carmen Kroll**  
Managing Partner

**Thomas Müller**  
Executive Director

**Danny Jüngling**  
Authorised Representative

- 308 HAKRO Private Label
- 310 NOS warehouse
- 312 Textiles lexicon
- 318 Our values

# HAKRO HÄLT. SEIT 1969

In 1969, instead of landing on the moon, Harry and Marianne Kroll opened a clothing store in Schrozberg. It was not long before they were concentrating on something that was a scarce commodity at the time: sustainable clothing. What would Neil Armstrong have said about it? Probably “Just clothing that works”.

^

Exceptionally durable workwear still remains the backbone of the HAKRO business, now being managed by the second generation of the family. Alongside this is consistently sustainable production, which has been an integral element of our brand values for many years. We offer an ever-expanding range, which makes us increasingly better at meeting our customers' needs. HAKRO stands for teamwear diversity from head to toe.

**The HAKRO logistics centre**

Our entire global production is delivered here and is stored on around 11,000 pallet spaces.

<

**We love this picture**

Harry and Marianne Kroll (fourth and first from left) in 1969 with employees of the Harry Kroll clothing store in Schrozberg.

6 M

Items of clothing are always available in the HAKRO NOS warehouse – Never out of stock.

# 184

Employees of 17 nationalities work at HAKRO's headquarters in Schrozberg. 67 percent of these are women. Training and inclusion are of equal importance to us.

## **Respect, appreciation and humanity.**

The people who work for and with us mean a lot to us. This shapes our team spirit and the way we work together: it applies equally to some 2,500 members of staff who work for our production partners around the world.

**Our teams are creative, innovative and flexible. A stimulating environment, spaces for dialogue and meetings, and plenty of recreational areas create a structure where everyone can develop their potential.**

^

**Refuelling in the HAKRO dining room**  
It's not called a canteen – it isn't a canteen, because everything tastes much better, and even the ambience is far more to our taste.

<

**Our spirit is alive even in the showroom**  
With plenty of greenery and attractive seating areas, our showroom is much more than an area for displaying goods too.

**OUR VISION IS CLEAR-CUT AND FIRMLY ESTABLISHED.**

**Always one step ahead.**  
We live and uphold values.  
In an exemplary fashion.  
Leaders in our sector.  
Inspirational for everyone  
who works for us and who  
wears our clothes.

# 117

is the number of **specific goals** that we have defined in our integrated sustainable business strategy.

**Always one step ahead.** With an integrated sustainable business strategy, we translate our vision into specific goals and projects. Our progress is documented in regular reports. These are available to you here in PDF format.

# QUALITY IS A POINT OF HONOUR TO US.

**HAKRO hålt (HAKRO endures) because we uphold our quality standards in every fibre, every colour and every detail of our textiles. Our customers have put their trust in us for over 50 years. It is also a point of honour to us that you can always rely on the highest quality.**

^

The sewing machines that work for HAKRO only accept tear-resistant brand-name thread with which, in accordance with our customers' wishes, they sew using significantly more stitches than is the norm.

### Quality begins with the raw materials.

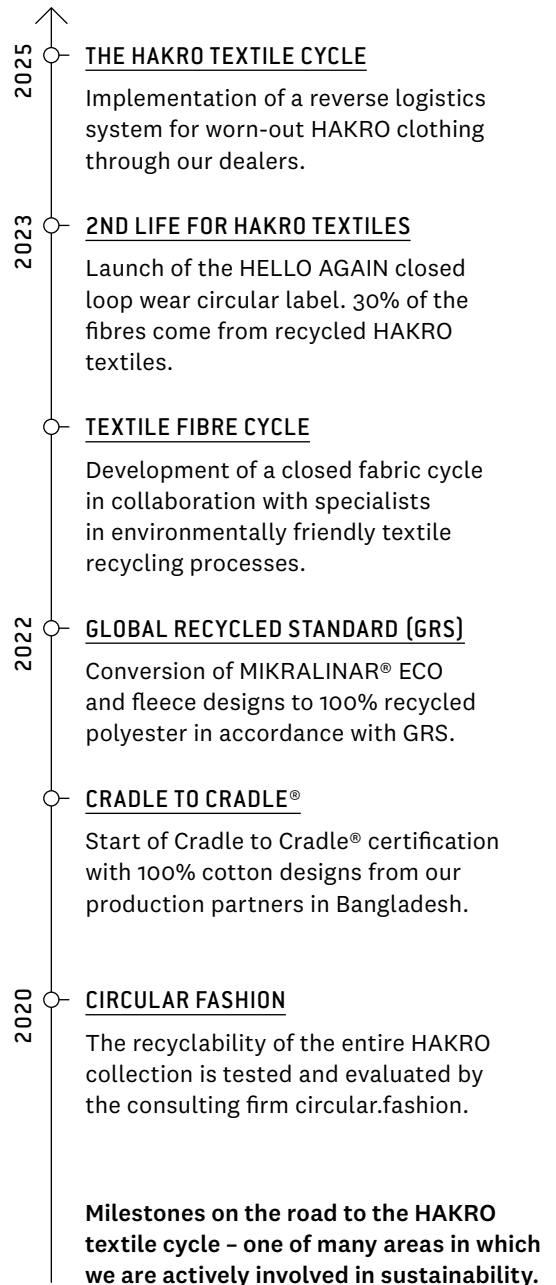

This is why we only use long-staple cotton, which makes our fabrics extremely hardwearing, and gives an even surface for perfect finishing. Quality is a constant through every stage of our supply chain, which means you can rely on the best materials and high-quality workmanship in all our designs.

# 0.1%

is our **ratio of complaints**. Sometimes the smallest numbers really are the best.

# WE LEAD THE WAY.

We broke the mould, entered the uncharted territory of sustainability, learned from our setbacks, and impressed others. Because all this is only possible when we work together.

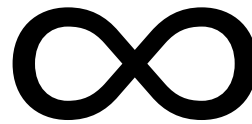

Since 2021, HAKRO has been a member of Fair Wear. We achieved the highest status of “LEADER” in 2024, and in the 2025 Brand Performance Check we were able to improve on this still further. In addition, many of our products fulfil the criteria in accordance with GOTS, GRS, C2C and other standards.

**What does sustainability mean to you?**

Responsible corporate management: is this just a nice-to-have or a luxury; an extra job for department X, or purely CSR PR? What does it mean to you? What do you do in your business? We look forward to entering into any sort of constructive dialogue.

**Write to us at: [impact@hakro.com](mailto:impact@hakro.com)**

Incredible volumes of old textiles pile up to create gigantic mountains of waste. The textile recycling economy is one of the greatest opportunities of our time.

# MAXIMUM FREEDOM FROM HEAD TO TOE.

**Are you looking for the perfect outfit for your team? The 2026 HAKRO collection gives you more freedom than ever before. For any job, in any size, in many powerful colours – and from head to toe.**

# 176

the number of **different products** you can find in the 2026 HAKRO catalogue.

---

**HAKRO Teamwear is your stage.**  
Wear our logo proudly on your chest, or wherever you want. Our clothing is perfect for finishing that uses any standard process.

<

**HAKRO Private Label**  
If it's not exactly what you want, we will make it the way you want it. This is HAKRO Private Label. And even your shoes will look right.

# MODEL OVERVIEW

Show us your t-shirts, show us your shoes! We will be happy to make them for you. On the following pages we have arranged every model by product group.

A photograph of three people in work clothes against a red background. A woman in a yellow t-shirt and dark pants is on the left, smiling and pulling at the sleeve of a man in a blue t-shirt and dark pants on the right. Another man in a green t-shirt is partially visible behind them, also smiling. The text 'WORK PERFORMANCE' is overlaid in large white letters.

# WORK PERFORMANCE

Resilient outfits with many designs suitable for commercial laundering and made, for instance, from MIKRALINAR® and MIKRALINAR® ECO.

MIKRALINAR®:

# THE MATERIAL THAT HAS BEEN PUT THROUGH THE INDUSTRIAL WASH.

## MIKRALINAR® ECO

MIKRALINAR® ECO boasts the same properties as MIKRALINAR®, but it goes one sustainable step further. Because in this case only recycled polyester fibres, certified in accordance with the Global Recycled Standard (GRS), are used. Together with the OEKO-TEX 100 and our Fair Wear status seals, MIKRALINAR® ECO has also earned the government's Grüner Knopf (Green Button).

## MIKRALINAR®

MIKRALINAR® has been at the top of our bestseller list for years. The material that we ourselves developed combines the comfort of long-staple cotton with the particular tensile strength and resistance to wear and tear of a special high-tech polyester. Apart from blouses and shirts, all our textiles are made from MIKRALINAR®, and our performance trousers are suitable for commercial laundering in accordance with DIN EN ISO 15797.

## PROPERTIES

Extremely hard-wearing and tear-resistant

Suitable for commercial laundering in accordance with DIN EN ISO 15797

Exceptionally colour-fast and shape-retentive

Breathable and fast-drying

Feels pleasant on the skin and comfortable to wear

CERTIFIED BY CONTROL UNION  
CU 1056577

**MIKRALINAR®**

Functional T-shirt with a narrow neckband and neck tape. HAKRO COTTON TEC® Women's V-Neck Shirt features a V-neckline and the HAKRO COTTON TEC® T-Shirt has a round neckline. Collar seam and the inner seam of the side slits are reinforced with anthracite-coloured fabric tape. HAKRO COTTON TEC® is a double-faced material, created by combining two yarns, each with different functions, in a special knitting process. Outer layer is fine cotton single jersey and the inner layer is made of mesh from the functional fibre TRIACTIVE. Material provides temperature-regulating properties, quickly wicking moisture to the fabric's surface where it evaporates. Regular fit.

Functional blouse or shirt with a classy single-jersey appearance. Slightly tailored with darts in the back. Collar seam, the inner seam of the side slits, and the button placket are reinforced with tone-on-tone fabric tape. HAKRO COTTON TEC® is a double-faced material, created by combining two yarns, each with different functions, in a special knitting process. Outer layer is fine cotton single jersey and the inner layer is made of mesh from the functional fibre TRIACTIVE. Material provides temperature-regulating properties, quickly wicking moisture to the fabric's surface where it evaporates. Regular fit.

**Material** TRIACTIVE, double-face knitted fabric made from 60% cotton and 40% polyester (outer side: cotton single jersey; inner side: polyester mesh) **Property** pre-shrunk, temperature-regulating, breathable, moisture-wicking, easy-care **Garment finishing** embroidery, screen printing, transfer printing, digital printing

# THE FAMILY IS YOUR BEST TEAM.

**What does perfectly behaved mean? It's much more fun to have the perfect cool outfit!**

Take a look: what Mum and Dad wear is just as good for us. Everything is organic cotton, they say. That's good, too. The main thing is that it isn't scratchy, it's warm, and we look just like the grown-ups – but much cooler, of course. In five super designs and five great colours.

NATURAL FIBRES:  
THE BASIC MATERIAL  
FOR EVERY  
BUSINESS DESIGN.

## LONG FIBRES TO ENJOY FOR A LONG TIME AND FOR A SECOND LIFE.

We believe in long-staple, ring-spun, combed cotton. Its long fibres are essential for providing the best quality fabrics: soft, but hard-wearing, with a particularly smooth surface to allow the perfect finish. And high-quality, long-fibre textiles are also a necessity for textile recycling.

### PROPERTIES

Very comfortable stretchy material with a high proportion of cotton or natural fibres.

Many models certified in accordance with the Global Organic Textile Standard (GOTS)

Can be combined in many ways for a wide range of uses

Easy to care for and withstands many wash cycles

Functional T-shirt with a narrow neckband and neck tape. HAKRO COTTON TEC® Women's V-Neck Shirt features a V-neckline and the HAKRO COTTON TEC® T-Shirt has a round neckline. Collar seam and the inner seam of the side slits are reinforced with anthracite-colored fabric tape. HAKRO COTTON TEC® is a double-faced material, created by combining two yarns, each with different functions, in a special knitting process. Outer layer is fine cotton single jersey and the inner layer is made of mesh from the functional fibre TRIACTIVE. Material provides temperature-regulating properties, quickly wicking moisture to the fabric's surface where it evaporates. Regular fit.

# THE PERFECT CLIMATE ANYWHERE.

**Get into your comfort zone: add layer  
to layer for your perfect climate.**

April weather can happen any time of the year, and equally you might have to work in the rain, wind or snow. What must be must be. But what doesn't have to happen is for you to freeze, get wet or sweat unnecessarily. HAKRO functional clothing with high-tech breathable fibres offers exactly the right models. From the first layer next to your skin through to wind and waterproof jackets to keep you warm and dry anywhere.

It works:

# INSIDE AND OUT, UNDERNEATH AND ON TOP.

## HAKRO COTTON TEC®

The innovative double-face material combines high-quality cotton with high-performance TRIACTIVE fibre. Moisture is drawn efficiently to the outside, where it evaporates. The material dries fast and prevents a build-up of odour, making it the ideal fabric for strenuous activity.

## COOLMAX® ECOMADE

The high-performance fibre sourced from recycling: COOLMAX® EcoMade fibre technology offers the same moisture-management properties as COOLMAX® PRO – with a reduced ecological footprint at the same time. Special 4 or 6-channelled fibres draw moisture to the outer surface of the fabric, where it evaporates, ensuring that the clothing stays comfortably dry, even during strenuous activity. COOLMAX® EcoMade is made from 100% recycled PES, can be washed at 60° C, and can be used anywhere where optimum moisture control combined with comfort is required.

## TRIACTIVE PRO

The membranes of this functional textile keep out water and wind, while allowing water to escape from the inside to the outside. TRIACTIVE PRO offers excellent weather protection while being very breathable.

## TRIACTIVE

A high-quality functional yarn that uses multi-channel technology. It has been specially developed to draw moisture effectively to the outside, where it evaporates quickly. The textiles are breathable and extremely comfortable to wear, even for intense physical activity.

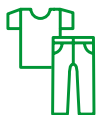

### PROPERTIES

High-performance functional fibres from leading brands

Maximum breathability, temperature regulation and quick-drying

Ideal for combining with other HAKRO textiles

Bright, vibrant colours

**STANDARD  
100**

The OEKO-TEX® STANDARD 100 is the leading label for textiles that have been screened for harmful substances, and sets the benchmark for safety in textiles.

# LABEL-FREE

The label-free models give you complete freedom to add your own label to the clothing and are only available from HAKRO in MIKRALINAR® ECO HEAVY quality.

# SNEAKERS & ACCESSORIES

You can make your team outfit complete and unique with our exclusive HAKRO sneakers, socks and individual accessories.

## QUICK FINDER

290 SNEAKERS

292 SOCKS

294 ACCESSORIES

>

**Short or long:**  
opinions about sneaker socks vary. But one thing is certain: it is easy to add visible embroidery to long socks.

MADE  
IN  
GERMANY

# WHERE CAN YOU FIND SOMETHING LIKE THAT? ONLY FROM HAKRO!

**PERSONALISE YOUR FEET.**  
Our sneakers and socks are happy to bear your logo.

Their upper material is made of 100% vegan apple skin, the inner sole of recycled plastics, and the outsole of recycled rubber. Laces made from the finest cotton put the finishing touch to this high-quality package. HAKRO ECO vegan sneakers are available exclusively from HAKRO. Your best option is to order socks to go with them at the same time.

#### The upper material

Vegan, sustainable, long-lasting and weather-resistant: apple skin made from dried apple waste mixed with polyurethane on a tear-resistant cotton/polyester backing.

#### The laces

Even the fastening is top quality, with laces made from the best cotton. No question about it, we feel very connected to these shoes.

#### The outsole

When it comes to sustainability the soles, made from at least 30% recycled rubber, don't slip up. We stand by them: you can be sure of that.

#### The inner sole

Removable PU foam inner soles made from recycled plastics will also win over anyone who believes in intrinsic value.

## FIT

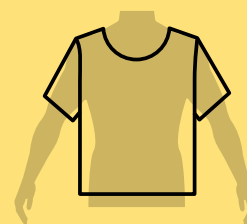

### BODY FIT

The right fit for those who like a close fit.

### REGULAR FIT

A happy medium for many people: not too tight and not too loose.

### COMFORT FIT

A comfortably loose fit with plenty of freedom of movement.

## TROUSER LENGTHS

### SHORT

31 inch for men's/  
unisex models

### REGULAR

32 inch for women's models and  
33 inch for men's/unisex models

### LONG

35 inch for men's/  
unisex models

\* From 2026, our men's/unisex trousers will be available in three lengths.

- All measurement charts and size specifications are subject to change. Improvements in cuts may lead to minor dimensional variations. We recommend trying on items at a HAKRO retailer.
- Collar size.** This is an additional measurement for shirts. You can work this out by placing a tape measure around your neck, just under the larynx. Please do this carefully.
- Kids.** Every child is unique. The ages indicated are therefore only meant as a rough estimate. Children's sizes are given as the height in centimetres.

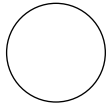

# YOUR COLOUR PALETTE IN THE WORKPLACE.

It is no myth that HAKRO colours withstand washing and the rigours of working life. This is all thanks to HAKRO TRUE COLOURS, our own high-tech colour technology. It's great that our many attractive colours remain attractive for so long.

# CERTIFIED SUSTAINABILITY.

Sustainability is firmly established in our corporate strategy. This is also reflected in our numerous certificates, quality seals and voluntary commitments, the criteria for which are often stricter than those laid down by the law.

## FAIR WEAR

We have been a member of the Fair Wear since 2021. This international multi-stakeholder initiative audits working conditions and social justice standards in the textile industry. In 2024, we achieved the status of Fair Wear “LEADER” – and we still maintain this status, with an increasing number of points.

# ORGANISATIONS

# PRODUCTS

Find out more about our certificates and collaborations at [www.hakro.com](http://www.hakro.com)

# YOUR POWERFUL INDIVIDUAL LOOK.

**HAKRO textiles are used to the printing process.**

From screen printing to thermal transfer or digital printing, their high-grade fibres create really smooth surfaces which guarantee the best printing results. And, of course, this means the same for embroidery, which in most cases looks even better.

## **9 fabulous friends.**

Our zip pulls make every zip unique, and they are attracting more and more fans.

## **Kool Savas**

Yes, it really is the German rapper himself. He is a perfectionist, and is really impressed by HAKRO.

Casual for a start-up, traditional for the office, or the cool merchandising collection – all our textiles are your stage for a powerful individual look. Add the matching accessories to perfect your look.

**Cleverly pulled together.**

We have drawstrings for our hoodies in a wide range of colours to create plenty of exciting looks.

**Cool sock seeks all types of feet.**

Our sock knitting machine makes it all possible: customised foot art, even in small runs.

# UNIQUE: WHEN BEING GOOD ISN'T GOOD ENOUGH.

**HAKRO Private Label is our expert service for your special requests. From individual designs to your own ideas for materials, colours, cuts or sizes, we can make almost anything possible for you – without compromising on quality or sustainability.**

<

### HAKRO Private Label

Our customisation experts will help you to create your own teamwear designs.

>

### Individual, not one of the crowd.

With HAKRO Private Label there is nothing you can't have: even customised socks. Made in Germany. Made for you.

### How your shoe is made.

Create your own individual HAKRO ECO vegan sneakers. HAKRO Private Label provides a whole host of options for a unique look: logo print, embossed tongue or coloured laces? Absolutely. Exclusive upper colours, stitching, outsole and inner sole? Not a problem, either.

**NEVER OUT OF STOCK:  
ORDERED TODAY,  
DELIVERED TOMORROW.**

**Availability is a particularly crucial aspect for corporate clothing – especially when it comes to repeat orders. With 176 models, 36 colours and 16 sizes, being able to deliver means that HAKRO must stock over 6 million items at any one time..**

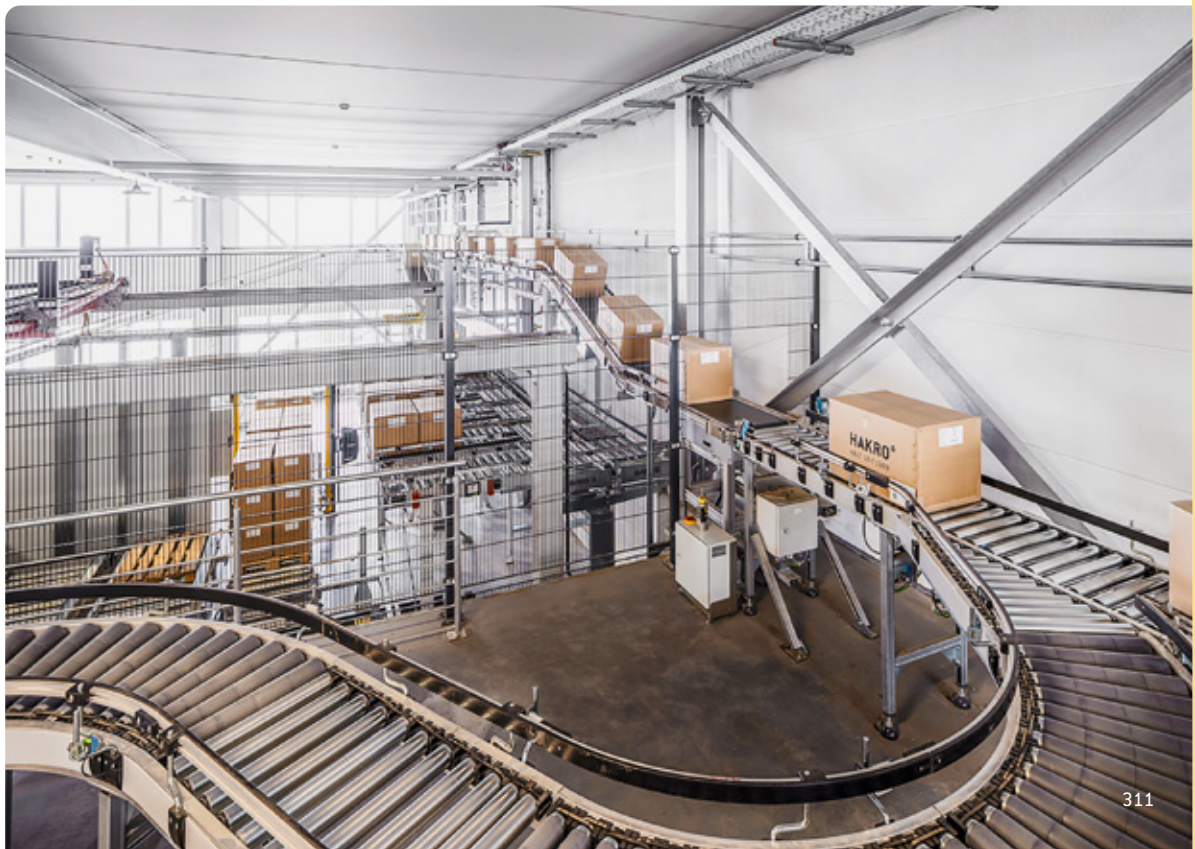

**The HAKRO NOS warehouse at the Schrozberg site houses some 10,900 palette spaces on space-saving mobile high-bay racks.**

NOS stands for Never out of Stock, and the name alone explains why this is of such value to our customers: 93% of more than 250,000 orders per year (as of 2024) are delivered within 24 to 48 hours.

**Automation enables maximum efficiency in the logistics process.**

Much of the work in our NOS warehouse seems to do itself. There are already plans for more steps towards full automation of our logistics centre.

v

# APPLE SKIN, RET ETC.: WHAT DOES IT ALL MEAN?

We don't know exactly what you consider good to know. But a bit of background information about the materials we use is bound to be of interest.

>

## **MIKRALINAR® and MIKRALINAR® ECO**

are the most importance fabrics when it comes to industrial washing, for example for strict hygiene standards: a healthy choice, and not only in healthcare.

---

# HAKRO MATERIALS

**Exclusively developed materials that are only available from us.**

## HAKRO COTTON TEC®

A double-face knitted material which combines two yarns with different functions: an especially fine cotton single jersey on the outside and a mesh layer made from the TRIACTIVE functional fibre on the inside. Moisture is wicked outside fast, allowing it to evaporate. This gives the textile a temperature-regulating property.

## HAKRO X-STRETCH

HAKRO X-Stetch is a very elastic 4-way stretch material that we use for many of our trousers. It fits the body perfectly, is comfortable and provides plenty of freedom of movement.

## MIKRALINAR®

Specially developed for HAKRO, the skin-friendly MIKRALINAR® functional mix combines the benefits of cotton with the strengths of a special high-performance polyester. Materials manufactured from MIKRALINAR® are suitable for commercial laundering and leasing, highly durable, retain their shape and are tear-resistant.

## MIKRALINAR® ECO

MIKRALINAR® ECO is the sustainable advanced version of MIKRALINAR®. It is made with recycled polyester in accordance with the Global Recycled Standard (GRS). Despite being soft to the touch, it is also tough and suitable for commercial laundering.

## TRIACTIVE

High-quality functional yarn which uses a special construction with multi-channel technology that carries moisture to the outside fast.

## TRIACTIVE PRO

This refers to fabrics that use a membrane that not only make them waterproof and windproof but also water vapour-permeable. HAKRO utilises TRIACTIVE PRO whenever clothing needs to be very breathable, water vapour-permeable and waterproof.

^

**HAKRO COTTON TEC®**  
extremely comfortable and offers  
a superb feel-good climate.

---

## OTHER MATERIALS

**High-quality products, in most cases from leading brand manufacturers, that we use for HAKRO textiles.**

^

**HAKRO ECO VEGAN SNEAKERS**  
with upper material made from robust,  
100% vegan apple skin.

### APPLE SKIN

Apple skin is a vegan leather alternative made using waste from the apple industry. Dried and pulverised apple residues are mixed with polyurethane (PU) and applied to a tear-resistant textile backing made from a cotton/polyester mix. The fabric is then heated, transforming it into a durable, weatherproof material.

### BIO-CIRCULAR DYNEEMA®

Dyneema® is a brand name for a high-strength poly-ethylene fibre. The material's very long chain of molecules gives it properties that include high tensile strength at low weight, low water absorption, high abrasion resistance and UV resistance. Bio-Circular Dyneema® has an improved carbon footprint due to the use of renewable raw materials from the wood and cellulose industries.

### COOLMAX® ECOMADE

The high-performance fibre sourced from recycling: COOLMAX® EcoMade fibre technology offers the same outstanding moisture management properties as COOLMAX® PRO with a reduced ecological foot-print at the same time. Special 4 or 6-channelled fibres wick moisture to the outer side of the fabric, where it evaporates, ensuring that the material stays comfortably dry, even during strenuous activity. COOLMAX® EcoMade is made from 100% recycled PES, can be washed at 60° C, and can be used anywhere where optimum moisture control combined with comfort are required.

### CORDURA®

CORDURA® is an extremely durable material made of high-strength nylon fibres. It is known for its excellent abrasion, tear and wear-resistant properties. CORDURA® is water repellent and lightweight for added protection and comfort.

### DOUBLE-FACE MATERIAL

A fabric made from two different materials which form the inner side and outer side. Double-face materials can be glued or woven together. Also see "HAKRO COTTON TEC®".

### ELASTOLEFIN

This is a synthetically-produced elastic fibre that is washable at higher temperatures than conventional elastane fibres, and can even be tumble dried without reducing its elasticity or destroying the elastic fibre. HAKRO uses Elastolefin in its Performance Line trousers, as these have been specially developed for commercial laundering.

## FLEECE

Fleece is a knitted fabric that is textured on one or both sides and is usually made of 100% polyester. Fleece is extremely lightweight, warming, windproof, elastic and very comfortable to wear. Microfleece is an especially light and high-quality version of fleece. Microfleece textiles from HAKRO are very easy to keep clean, and feature an additional anti-pilling finish. See also “Anti-pilling finish”.

## FULLY FASHIONED

A manufacturing method for knitted items that doesn't require any cutting. The components are knitted into shape and only a few single seams are necessary to complete the item.

## INTERLOCK

A flexible, double-faced knitted fabric that has knit stitches on each side so that both sides look the same. Interlock fleece has a rough-textured side to provide thermal insulation.

## KNITTED FABRIC

This kind of fabric is made by looping together one or more threads to form a single textile. They can be knitted or crocheted. Compared to weave fabrics, knitted fabrics are generally more elastic and less prone to creasing. HAKRO uses a range of knitted fabrics, such as single jersey, piqué, jacquard, fine knit, (French terry) sweatshirt material and mesh.

### WORKER-PERFORMANCE-ECO TROUSERS

with patch pockets, made from extremely robust CORDURA®.

v

## LAMINATE

Laminates are textiles made by bonding or melting onto a second layer. HAKRO frequently uses multilayer laminates in its waistcoats and jackets. Jackets made with two-layer laminates have a loose lining in the back to prevent direct contact with the membrane. With 2.5-layer laminates, the membrane is protected by adding another coating. Instead of this coating, three-layer laminates use another layer of fabric, such as microfleece or mesh, on the membrane. Multilayer laminates are up to 100% water-proof when the seams are taped after manufacturing. Multilayer laminates without this additional seal are only water repellent.

## LYCRA®

This protected brand name stands for an extra high-quality elastane from The LYCRA Company. LYCRA® is highly flexible and has excellent shape-retaining properties.

## MEMBRANES IN TEXTILES

A membrane is a special layer that is bonded firmly to the back of an outer material. Membranes increase the breathability of functional wear, making them more comfortable to wear. They also offer protection against environmental moisture while letting water vapour escape. Compared to coatings, membranes are robust, abrasion-resistant and thus more durable. Breathability is only a factor when there is a difference in temperature between the inside of an item and the outside. HAKRO uses membranes in products labelled TRIACTIVE® PRO.

## MERINO WOOL

The merino wool used by HAKRO is an extra-fine, non-scratch animal fibre that is soft to the touch. It has an even mesh, is pleasant to wear and can be washed at 30° C.

## NYLON

The generic term for polyamide 6.6, which has a higher elongation at break, lower tensile strength, higher melting point and lower moisture absorption than polyamide 6.

## PIMA COTTON

An extra high-quality cotton with long, fine fibres. Textiles made of Pima cotton have a flat surface and are full to the touch and exceptionally soft.

## PIQUÉ

Piqué is a crocheted fabric with a honeycomb or grainy structure that is traditionally used in polo shirts.

## POLYESTER

Since polyester fibres are synthetically produced, there is a wide range of them, and thus there is a suitable product for every need. Polyesters have a wide range of properties, which affect the functionality, moisture wicking properties, tear and abrasion resistance and comfort of the item they are used to make. HAKRO uses recycled polyester in many of its products. We also use Global Recycled Standard (GRS)-certified recycled polyester. In addition, we use recycled polyester from renowned manufacturer REPREVE® in our trousers. Models with this polyester contain “ECO” in the product name.

## RIPSTOP

A highly tear-resistant fabric woven together using a special technique. Thicker fibres are woven at intervals into the fine material. This makes ripstop a stable and tear-resistant material.

## SINGLE JERSEY

A finely woven, flexible knitted fabric used in outer clothing.

## SOFTSHELL

At HAKRO, we use the term softshell to describe the combination of the outer and middle layer in a single product. See also “Laminate”. The material is smooth and wind and waterproof on the outer side. On the inner side, it has a soft surface and is pleasant to wear. Soft-shell jackets are elastic and suitable for workwear because they allow plenty of freedom of movement.

## SWEATSHIRT MATERIAL

A single-layer, usually circular-knit fabric that also features a soft lining thread that is concealed in the front by a cover thread. Finished items have only knit stitches on one side. On the reverse, either purl stitches or the lining thread can be seen, or it is heavily roughened. Clothing made with roughened sweatshirt material tends to form lint on the inner side, but this stops after the first few wash cycles. French terry sweatshirt materials are not roughened on the reverse side.

## STRETCH

Fabrics that have a proportion of elastane are more flexible, making them more comfortable to wear and increasing freedom of movement. Elastane is a synthetic fibre. See also “HAKRO X-STRETCH”.

## WEAVE FABRICS

Some fabrics are made by weaving together two groups of threads (warp and weft) at right angles. HAKRO uses different types of weave fabrics: poplin, satin and twill. Weave fabrics have a simple warp and weft pattern and are light and flexible. Double weaves are made from two layers of fabric. They are thicker, stronger, warmer and better suited for heavy-duty use.

## YARN

A heavy thread comprising two or more threads twisted together, often used in clothing. Yarns have high tensile strength, giving the seams high durability. HAKRO only uses quality yarns from renowned brand manufacturers.

>

### **X-Stretch ECO 5-pocket jeans**

HAKRO X-STRETCH is used in many of our trouser models and ensures maximum comfort.

---

## THIS AND THAT

**Processing techniques, standards and other textile terminology.**

### ANTI-PILLING FINISH

A finish that helps prevent the formation of tiny fibre balls (pills) on the surface of the fabric.

### PRE-SHRINKING

Pre-shrinking is a form of mechanical/thermal textile treatment which guarantees that the treated textiles will only shrink slightly within specified tolerances when washed.

### HACCP

Acronym for “Hazard Analysis and Critical Control Points”, which is a systematic approach to ensuring food safety. HACCP-compliant clothing for employees who come into contact with food is a key component of this hygiene concept.

### INDUSTRIAL WASHING

Also referred to as commercial laundering. Workwear is often cleaned in industrial laundries, where it is subjected to greater stresses (mechanical, thermal and chemical) than in a home wash cycle. DIN EN ISO 15797, which is often cited on this subject, is a test standard that determines the suitability of items for industrial washing.

### LOCKSTITCH

A technique used to sew on buttons more durably by securing (locking) not just the button but also the end of the stitch.

### RET VALUE

A textile's resistance to evaporation (RET) value indicates how permeable it is to water vapour. The value reflects the force that water vapour requires to pass through the textile.

^

HAKRO uses long-staple, combed, ring-spun cotton.

### STAPLE LENGTH

The length of fibres. The longer the fibres, the higher the quality of the fabric. For cotton in particular, staple length is a key sourcing criterion.

### SURFACE WEIGHT

The weight of a fabric in grammes per square metre. It is a general indicator of textile quality. But heavy fabrics are not always better. The high durability of our fabrics allows us to reduce the surface weight of some textiles to improve comfort without compromising on quality.

### WATER COLUMN

A measurement unit denoting how waterproof a fabric is. The water column indicates how much water an outer material can withstand before it lets moisture through. A water column of one metre is the equivalent of approximately 0.098 bar. Clothing with a water column of 1,300 mm or more can be called waterproof. HAKRO, however, adds another zero and with the new High Active Jacket it achieves ten times this value with 13,000 mm.

### WIND RESISTANCE

Windproof textiles prevent the wearer from cooling down too quickly. The higher the wind speed, the colder it feels (chill factor). For example, an outside temperature of  $-1^{\circ}\text{C}$  feels like  $-21^{\circ}\text{C}$  at wind speeds of 64 km/h. Windproof textiles significantly reduce the chill factor.

# OUR VALUES

There are a few things which we at HAKRO value most highly: quality, responsibility and variety. The following overview shows the steps we take to put our high standards into practice:

## QUALITY

### RESOURCES AND MATERIALS

Long-staple, ring-spun, combed cotton

Approved functional fibres from leading brand manufacturers

Our own application-optimised fabrics with the ideal surface weight

Smooth surfaces with the optimum properties for finishing

### HAKRO TRUE COLOURS COLOUR MANAGEMENT SYSTEM

HAKRO colour formulas, optimised for different materials

Colour consistency across models, fabrics and delivery batches

Colourfast with no fading. For many models even when commercially laundered

Technical and visual colour control in every process step

### PROCESSING

Flexible, stable seams: 20 types with high stitch density

Unbreakable buttons, sewn on durably using lock stitch

High-quality zips and eyelets produced by specialists YKK®

Certified quality management system for all production processes

### COMFORT

Fits and sizes that fit well

Freedom of movement and shape retention

Breathable and fast drying

Pleasant on the skin, comfortable to wear

# RESPONSIBILITY

## PEOPLE AND THE ENVIRONMENT

Integrated sustainable corporate strategy

The highest social standards from raw material to the finished textile

Consistent reduction of pollutants in all areas

Innovation management for continuous improvement

## CIRCULAR ECONOMY

Returns of worn-out HAKRO Workwear

Chemical-free mechanical fibre recovery

Yarn production from 30% recycled HAKRO textile fibres

HAKRO 2nd Life label: leisure wear under the HELLO AGAIN closed loop wear brand

# VARIETY

## COLLECTION LINES

Work Performance

Corporate Essentials

Active Function

Label-Free

Sneakers & Accessories

## RANGE AND DEPTH OF PRODUCTS

176 models for complete outfits from head to toe

3 fits, 3 trouser lengths and 16 sizes

36 colours with consistently reliable shades

HAKRO Private Label for special customer requirements

# MIX & MATCH

Corporate clothing from a single source and a single mould: HAKRO textiles go perfectly together – even if you mix different collections.
